1. How to use the rechargeable rear LED light

For a video guide to help with the following steps please go to the following URL and click on how to videos:

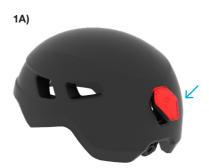

www.youtube.com/user/LazerSport

This LED complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The Lazer Urbanize comes with a rechargeable rear LED light which is designed to fit perfectly in the rear of the helmet.

1) To install in the helmet, simply align the LED light with the rear hole. First push the top in and then the bottom as shown in diagram 1A. **2)** To turn the light on, simply short press the logo on the front of the light.

To cycle between the light modes short press the same button. To turn of the light cycle through all light modes until the light is off.

Light modes:

1. Constant Run time 8 hours

2. Flashing Run time 26 hours

3. Pulsing Run time 10 hours

4. Off

The LED light in the Lazer Urbanize will need to be charged before use.

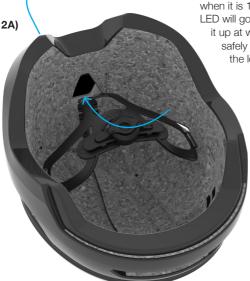

After approximately 8 hours of use on constant mode you will need to recharge your battery.

To do this you will need to remove it from the helmet.

1. Reach into the helmet, push the head basket away slightly and push the light out of the back of the helmet as shown in diagram 2A.

3. Now using the cable provided, plug the battery in to a standard 5V USB power source (smartphone charger, computer USB port) of a renowned manufacturer. Charge for approximately 2 hours to fully charge the light. During charging time, the battery signal led will turn solid red and when it is 100% charged, the charging LED will go out. Feel free to charge

it up at work while your helmet is safely locked to you bike using the lock hole.

Thank you for choosing the Lazer helmet. You have made an excellent choice that will help to reinforce your safety while cycling: the sport for which this helmet has been designed. Lazer helmets conform to the strict criteria of international standards.

Wearing a helmet may reduce the seriousness of injuries to the head that may occur during a sports accident. For this reason, it is important to use this protective gear properly.

Instructions for use and care

- 1) No helmet can protect the wearer against all possible impacts.
- **2)** The helmet is designed to be retained by a strap under the lower jaw.
- 3) To be effective, a helmet must fit and be worn correctly. To check for correct fit, place helmet on head and make any adjustments indicated. Securely fasten retention system. Grasp the helmet and try to rotate it to the front and rear. A correctly fitted helmet should be comfortable and should not move forward to obscure vision or rearward to expose the forehead.

- **4)** No attachments should be made to the helmet except those recommended by the helmet manufacturer.
- 5) The helmet is designed to absorb shock by partial destruction of the shell and liner. This damage may not be visible. Therefore, if subjected to a severe blow, the helmet should be destroyed and replaced even if it appears undamaged.
- 6) The helmet may be damaged and rendered ineffective by petroleum and petroleum products, cleaning agents, paints, adhesives and the like, without the damage being visible to the user.
- **7)** A helmet has a limited lifespan in use and should be replaced when it shows obvious signs of wear.
- 8) This helmet should not be used by children while climbing or doing other activities where there is a risk of hanging or strangulation if the child gets trapped whilst wearing the helmet.
- 9) This helmet is designed only for the following activity: cycling, roller skate, skateboard. It is not designed to be used with mopeds or any other type of sport, mechanical or not.

For other and more helmet instructions, please refer to the owner manual included with the helmet.

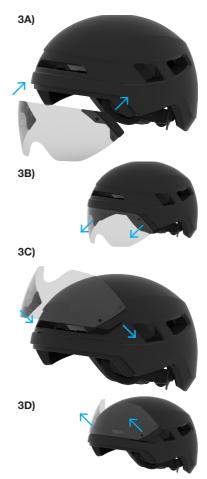

LAZER

Lamorinièrestraat 33-37 2018 Antwerp - Belgium www.lazersport.com The Urbanize helmet comes with a magnetic panoramic lens to protect your face from the wind as you ride fast, and from the rain when it pours. Holding the lens in place are 4 sets of super strong neodymium magnets. This allows you to easily snap the lens into place in the installed position, or in the docking position.

- 1) To install the magnetic panoramic lens, align the lens with the lower brim on the front of the helmet as shown in diagram 3A. The magnets will snap the lens securely into the correct position.
- 2) To remove, simply pull the lens away from the helmet as shown in diagram 3B.

For convenience, you can dock the lens. This is suitable for when you want to ride without the lens installed, but still want to take it with you in case you change your mind. You can also use the helmet without the lens at all.

- 1) To dock the magnetic panoramic lens, align the lens wit the upper brim on the front of the helmet as shown in diagram 3C. The magnets will snap the lens securely into the correct position.
- 2) To remove, simply pull the lens away from the helmet as shown in diagram 3D.

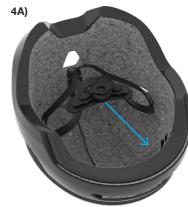

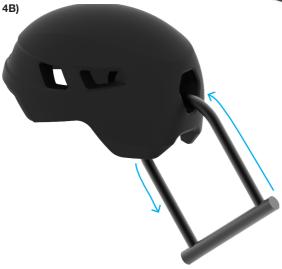

The Urbanize helmet can be securely locked with your bike using your bike lock. The lock hole is in the rear of the helmet.

To use the lock hole, first make sure the light is removed. Pull the fit system out of the way as shown in diagram 4A and while holding it out of the way thread your lock through the lock hole as shown in diagram 4B.

The maximum diameter of lock which can be used is 25mm.
