The Lazer Impala helmet comes with an action camera mount, suitable for attaching a camera or lights with a standard GoPro mounting system.

To attach the action camera mount to the helmet:

**1)** Position the mount on the center vent hole second from the front with the arrow on the bottom of the mount facing forward (as shown in diagram **1A**).

1A)

LAZER

1

**2)** Take one Velcro strap, feed it through the center vent hole second from the front, then back up through the next vent hole (as shown in diagram **1B**).

1B)

**3)** Then feed the strap back through the mount, double back and fasten Velcro pads (as shown in diagram **1C**).

**4)** Repeat steps **1-3** for the other side.

**Thank you for choosing the Lazer helmet. You have made an excellent choice that will help to reinforce your safety while cycling: the sport for which this helmet has been designed. Lazer helmets conform to the strict criteria of international standards.**

**Wearing a helmet may reduce the seriousness of injuries to the head that may occur during a sports accident. For this reason, it is important to use this protective gear properly.**

#### Instructions for use and care

- 1)** No helmet can protect the wearer against all possible impacts.
- 2)** The helmet is designed to be retained by a strap under the lower jaw.
- 3)** To be effective, a helmet must fit and be worn correctly. To check for correct fit, place helmet on head and make any adjustments indicated. Securely fasten retention system. Grasp the helmet and try to rotate it to the front and rear. A correctly fitted helmet should be comfortable and should not move forward to obscure vision or rearward to expose the forehead.

**4)** No attachments should be made to the helmet except those recommended by the helmet manufacturer.

**5)** The helmet is designed to absorb shock by partial destruction of the shell and liner. This damage may not be visible. Therefore, if subjected to a severe blow, the helmet should be destroyed and replaced even if it appears undamaged.

**6)** The helmet may be damaged and rendered ineffective by petroleum and petroleum products, cleaning agents, paints, adhesives and the like, without the damage being visible to the user.

**7)** A helmet has a limited lifespan in use and should be replaced when it shows obvious signs of wear.

**8)** This helmet should not be used by children while climbing or doing other activities where there is a risk of hanging or strangulation if the child gets trapped whilst wearing the helmet.

**9)** This helmet is designed only for the following activity: cycling, roller skate, skateboard. It is not designed to be used with mopeds or any other type of sport, mechanical or not.

The adjustable visor of the Impala can be set in 3 different positions depending on your preference.

Positions 1, 2 and 3

1) To adjust the visor, simply loosen by turning the visor bolts counter clockwise using a small coin, large flat head screwdriver or similar blunt object.

Position the visor where you want it, then re-tighten the bolt by turning clockwise.
